

Sealant Removal Wipes

Bergdahl Associates supplies a revolutionary tool for anyone using sealants, mastics and silicone bonding compounds. Sealant Removal Wipes are a unique non-woven fabric impregnated with a non-toxic aqueous solution. They safely remove uncured or partly-cured adhesive and sealant by breaking the surface tension between the material and the substrate. The material then transfers to the wipe for disposal. Sealant Removal Wipes are packed in quantities of 150 wipes in a convenient resealable tub.

If you have always felt there must be a better way of cleaning up, you were correct and now you can have it. No solvents, no abrasives, no fuss and no mess! Anyone applying sealants, adhesives or mastics can improve their operation using Sealant Wipes.

Advantages

- Biodegradable – (a “green” product)
- Non-Toxic – eliminates the need to dispose of hazardous solvents
- Mild – employees may not need hand protection to use this product
- Inexpensive – less expensive than cloth towels and solvents

Sealant Removal Wipes can be used anywhere adhesives or sealants are applied. Industries that are benefiting from using our product include:

- **Petroleum Industry**
Use Wipes to clean up after applying sealant or adhesives to fuel tanks or secondary containment sump.
- **Boat building**
Use Wipes to clean up after applying adhesives in the construction of fiberglass and SMC watercraft.
- **Manufacturers** using adhesives or sealants.
Use Wipes to remove excess uncured adhesives or sealants in manufacturing and assembly processes

Take Advantage of a great “wipertunity” to improve your sealant cleanup process.
