

Now, introducing the Quantum for the real world.

When we assigned our engineers to build the very best packer manifold possible, we got no surprises. We got the Quantum, a device so ahead of its time, it will handle fuels that haven't even been invented yet.

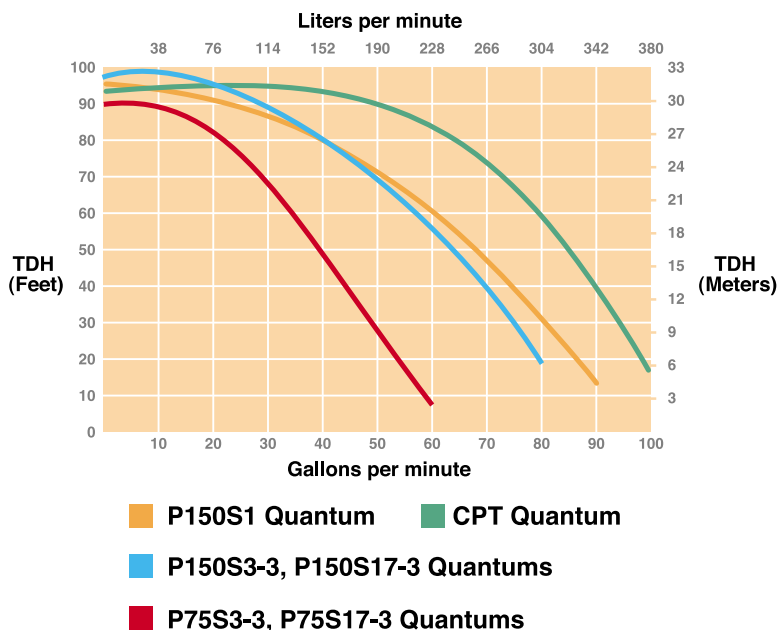

Which is great, but a lot of service station operators are willing to bet that what they're pumping today is what they'll be pumping tomorrow. They don't need space-age seals and super corrosion-resistant components. They need a pump that handles regular diesel or unleaded, with conventional amounts of oxygenates.

So we built the Quantum 20. Same basic design and configuration as the Quantum, using more down-to-earth materials. Quantum 20 offers the same high volume flow rates, the same easy serviceability and it will handle all major highway fuels in use today.

It's a down-to-earth solution, with a down-to-earth price.

REDJACKET

Performance Comparison

Quantum 20 pumps are now shipped in Red Jacket's new *Pal-et-case™*, which offers superior shipping protection. *Pal-et-cases* can be stacked three high and nine units can be handled by a standard fork lift at one time.

Designed for Hazardous Location:
Class 1, Group D atmospheres

Quick-Set Adjustment Range:
QS1 = 60" - 90"
QS2 = 90" - 150"
QS3 = 150" - 210"

Agency Listing of Retrofit:
UL
CSA

4" Horsepowers Available:
1/3 HP, 60 HZ, 1-phase
3/4 HP, 50 HZ & 60 HZ, 1-phase
1 1/2 HP, 50 HZ & 60 HZ, 1-phase
X3, 60 HZ, 1-phase
X4, 50HZ, 1-phase or 3-phase
X5, 60 HZ, 1-phase
2 HP, CPT, 1-phase or 3-phase

Vapor Recovery Pump Driving Port:
1 Available. 1" NPT

Expansion Relief/Static Pressure Range:
Adjustable from 0-40 PSI (0-2.8 Bar)

Syphon Ports:
2 available. 3/8" NPT. Vacuums generated up to 25 in Hg.

Fuel Compatibility:
Diesel
100% Gasoline
80% Gasoline with 20% Ethanol, Methanol, TAME, ETBE, or MTBE

Line Pressure Port:
1 Available. 1/4" NPT

Vent Port:
1 Available. 1/4" NPT

Providing solutions ...through listening to customers. SM
