## " ATLANTIS TRUCK WASH"

- Easily washes irregular shaped vehicles
- Provides multiple chemical passes
  - On board diagnostics
  - Variable drive speed
- 350 GPM pumping system (reclaim or fresh water)
- Fresh-water or spot-free rinse available

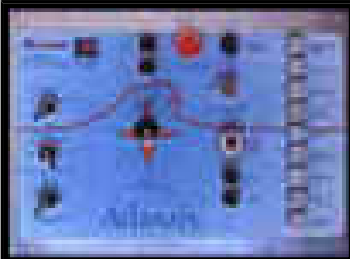

### Rocker Panel Wheel Blaster

As it moves to the back of the vehicle, the optional rocker panel blaster effectively removes dirt and road grime from the rocker panels. On the return pass, the Atlantis' optional wheel blaster pauses at each wheel to efficiently clean the wheels with a high volume of water.

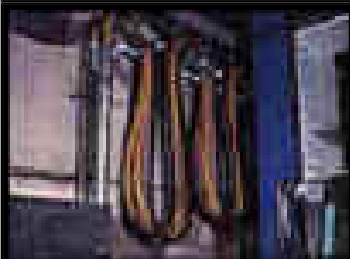

### High Impact

The Atlantis utilizes Ryko's exclusive high impact technology to deliver a great force of water to the vehicle surface for a clean that no other wash system can match.

### Control Panel

The Atlantis control panel is an easy to read, operator friendly center. It contains a joy stick for the extra wash capability.

### Tag-Line Assembly

The tag-line assembly contains all electric, chemical and water lines which operate on a track allowing ease of movement of the Atlantis.

## Adjusting Top Carriage

The top carriage detects and automatically lowers when it reaches the front and back of the vehicle. This allows the Atlantis to apply chemicals and deliver a high impact wash to these often overlooked areas.

### Additional Features

- Capable of washing vehicles of varying size and shapes
- Simple automatic or manual operation
- On Board Diagnostic System to reduce costly down-time
- Multiprogrammable PLC for customized wash programs
- Variable frequency drive with seven available speeds
- Customized multiple chemical passes for heavily soiled vehicles
- Separate equipment room not necessary

**Other Options available: Underbody Wash & Water Reclaim System**
