" ULTRA SONIC 2001 Overhead"

SUPERIOR WASH QUALITY IN TWO MINUTES

NO BAY PLATE

NO BEARINGS TO GREASE

NO RUBBER TIRE WHEELS

LOWER MAINTENANCE COST

NO COSTLY CHEMICAL DUMPING

No Bay Plates Needed!

The OHD accurately detects vehicle position with the use of our UltraSonic Vehicle Detection System. When a vehicle enters the wash bay and arrives in position, the OHD accurately locates and sizes the vehicle accordingly for the optimum wash.

Top Wash in About 2 Minutes!

Separate overhead manifolds are used to apply tri-colored foam, clear coat and spot-free rinse. Limiting the need for the robotic arm to the pre-soak and Hi-Impact wash cycles decreases the overall wash time substantially.

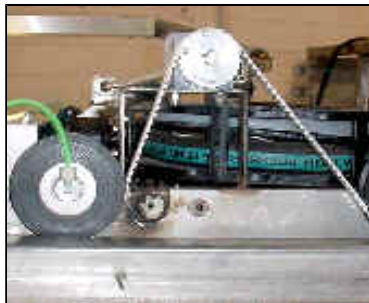

Stainless Steel Gantry

The all stainless steel gantry rides on an all stainless steel support system. Say "goodbye" to corrosion. Available as a wall mount (as shown) or with "legs". Stainless steel is included with all UltraSonic OHD machines at no additional cost.

Fits in shorter wash bays.

The UltraSonic OHD will easily operate in shorter wash bays. The OHD pumping system and controls can comfortably fit in smaller wash bays even if an equipment room is unavailable.

Tape Drive.

No rubber tire wheels. The all new tape-belt overhead drive system increases reliability, provides precise machine-to-vehicle positioning, eliminates slipping drive wheels and decreases cost of operation.

Powerful oscillating Rocker/Wheel Blasters

clean vehicle's lower side panels and wheels with the full force of the powerful Ryko High Impact technology as the vehicle enters the bay. A great money making option.

No Chemical Dumping!

The pivoting robotic spray arm contains 2 different sets of application manifolds: The High Impact spray manifolds for the wash cycle and solution manifolds for pre-soak application. Reduces chemical costs substantially.

Tri-Foam Application.

The OHD applies 3 different colors of foam from each side of the overhead mounted gantry. The OHD covers the vehicle with colorful and fragrant foam in only seconds. Another great option.

Choice of drying equipment.

The 2 fan Slim Line dryer is ideal for shorter wash bays. The powerful Thrust Pro Dryer delivers the ultimate in drying performance. One of the most requested and profitable car wash upgrades...[MORE DETAILS](#)
